## AUTHOR GUIDELINES

### GUIDING PRINCIPLES

An acceptable manuscript will meet the following general criteria: it reports a worthwhile contribution to science, sound methodology was used and is explained with sufficient detail so that other capable scientists could repeat the experiments. Conclusions are supported by data, manuscripts is concise, well written, and understandable. Use the reference with a minimum of 10 years of updated journal year.

Researchers should conduct their research from with best practices and codes of conduct of relevant professional bodies and/or national and international regulatory bodies. In rare cases, it is possible that ethical issues or misconduct could be encountered in your journal when research is submitted for publication.

Jurnal Ilmu and Teknologi Ternak (JITEK) is committed to upholding the integrity of the scientific record. Authors should refrain from misrepresenting research results which could damage the trust in the journal, the professionalism of scientific authorship, and ultimately the entire scientific endeavour. Maintaining integrity of the research and its presentation is helped by following the rules of good scientific practice, which include\*:

1. The manuscript should not be submitted to more than one journal for simultaneous consideration.
2. A single study should not be split up into several parts to increase the quantity of submissions and submitted to various journals or to one journal over time (i.e. 'salami-slicing/publishing').
3. Concurrent or secondary publication is sometimes justifiable, provided certain conditions are met. Examples include: translations or a manuscript that is intended for a different group of readers.
4. Results should be presented clearly, honestly, and without fabrication, falsification or inappropriate data manipulation (including image based manipulation).
5. No data, text, or theories by others are presented as if they were the author's own ('plagiarism'). Proper acknowledgements to other works must be given (this includes material that is closely copied (near verbatim), summarized and/or paraphrased), quotation marks (to indicate words taken from another source) are used for verbatim copying of material, and permissions secured for material that is copyrighted. JITEK has the right to and will screen for plagiarism of the submitted paper with a software.
6. Authors should make sure they have permissions for the use of software, questionnaires/(web) surveys and scales in their studies (if appropriate).
7. Authors should avoid untrue statements about an entity (who can be an individual person or a company) or descriptions of their behavior or actions that could potentially be seen as personal attacks or allegations about that person.
8. Research that may be misapplied to pose a threat to public health or national security should be clearly identified in the manuscript (e.g. dual use of research). Examples include creation of harmful consequences of biological agents or toxins, disruption of immunity of vaccines, unusual hazards in the use of chemicals, weaponization of research/technology (amongst others).
9. JITEK encourage a research to be authored by more than one person to ensure and maintain the scientific qualities of the research article, while also would provide a broader network on the scientific communities.

10. Authors are strongly advised to ensure the author group, the Corresponding Author, and the order of authors are all correct at submission. Adding and/or deleting authors during the revision stages is generally not permitted, but in some cases may be warranted. Reasons for changes in authorship should be explained in detail. Please note that changes to authorship cannot be made after acceptance of a manuscript.

### **MANUSCRIPT FORMAT**

Manuscript should be uploaded to JITEK journal system and arranged in JITEK standard format, Title, Authors, Address and Email, Abstract, Keywords, Introduction, Materials and Methods, Result and Discussion, Conclusion, Acknowledgment and References. Typed at one side of white paper of A4 size, in single column, 1.5 space line, 10 point Times New Roman font and should be given line numbers. Margins on all four sides are 2 cm.

### **MANUSCRIPT TITLE**

The title of the paper should be concise and informative. Avoid abbreviations and formula where possible. It should be written clearly and concisely describing the contents of the research.

### **AUTHORS**

Manuscript has main author and co authors with full name of the author and co-authors (no abbreviation), includes address (es) and email addresses clearly.

### **ABSTRACT**

The abstract comes after title page in the manuscript. Abstract must be integrated and independent which is consist of introduction and purpose, methods, results, conclusion and suggestion. However the abstract should be written as a single paragraph without these headers. For this reason, References should be avoided. Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself. Abstract must be written no more than 300 words which has no reference and accompanied keywords.

### **KEYWORDS**

The keywords should be avoiding general and plural terms and multiple concepts. Do not use words or terms in the title as keywords. These keywords will be used for indexing purposes. Keywords should not more than 5 words or phrases in alphabetical order.

### **INTRODUCTION**

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results. Explain how you addressed the problem and clearly state the aims of your study. As you compose the introduction, think of readers who are not experts in this field. Introduction must be written using 750 until 1000 words

## **MATERIALS AND METHODS**

It should be mention time and place of research in first part. All materials and methods that used such chemical for analysis, treatment and experimental design must be stated clearly and briefly. State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results. A Theory section should extend, not repeat, the background to the article already dealt with in the Introduction and lays the foundation for further work. a Calculation section represents a practical development from a theoretical basis. Materials and methods must be written using 400 until 600 words.

## **RESULTS AND DISCUSSION**

Result and discussion must be written in the same part. They should be presented continuously start from the main result to the supporting results and equipped with a discussion. Unit of measurement used should follow the prevailing international system. All figures and tables placed separately at the end of manuscript pages and should be active and editable by editor.

## **CONCLUSION**

Conclusion should be explained clearly. Conclusion and suggestion must be written using 40 until 80 words. And there is no suggestion if not required.

## **ACKNOWLEDGEMENT**

State the grant source and the person to whom the grant was given. Name the person to help you work.

## **REFERENCES**

The author-year notation system is required and completed. All reference mentioned should be written down in reference using American Psychological Association (APA) style and arranged from A to Z. Articles have 10 recent references or over and 80% is journal. The most of references are primary ones (last five years). Unpublished data and personal communication should not be cited as literature citations. "In Press" articles that have been accepted for publication may be cited in references. Include in the citation the journal in which the "in press" article will appear and the publication date, if a date is available.
