

JITEK
JURNAL ILMU DAN TEKNOLOGI HASIL TERNAK
E-ISSN 2338-1620 | P-ISSN 1978-0303
Volume 15, Issue 3, November 2020, page 131-204

Jurnal Ilmu dan Teknologi Hasil Ternak (JITEK) is a peer reviewed triannual journal publishing reviews, original papers, research notes, and symposium papers for mediating the dissemination of researchers in food science, microbiology, biotechnology of animal products, functional food derived from animal products, and current findings in processing technology for animal products. Animal products include meat, dairy, poultry, insects and their by-products. JITEK is published in March, July, and November by Department of Animal Products Technology, Faculty of Animal Science, Universitas Brawijaya, Malang, Indonesia.

JURNAL ILMU DAN TEKNOLOGI HASIL TERNAK has been published since 1 April 2007 by Department of Animal Products Technology, Faculty of Animal Science, Universitas Brawijaya, Malang, Indonesia in collaboration with Perhimpunan Ahli Teknologi Pangan Indonesia (PATPI).

PREFACE

The research in animal products and technology have been continuously marching forward to improve the quality of human life. Extensive observation on animal products and processing technology has become a trend around the world in order to share and elucidate the knowledge. Starting from 2020, Jurnal Ilmu dan Teknologi Hasil Ternak (JITEK) is published three times a year in March, July and November to give more chances for contributors who would like to submit their works to JITEK.

In current issue, a diverse research on animal products is provided such as dairy and meat products, the safety of animal-derived products in general market, alternative preservation technique, the utilization of alternative food ingredient from food waste, the quality of broiler carcass affected by diet from local resources, and the utilization of animal byproducts.

The published articles in current issue is then aimed to contribute to the knowledge in animal products and technology as well as its application. Thanks to the contributors from various institutions. We would also like to express our gratitude to the editorial team and reviewers for the hard work and cooperation, as well as authors who have entrust us publish their work to us.

Reviewer Volume 15 Issue 3 2020 (November)

1. Prof. Wasmen Manalu, Ph.D, Faculty of Veterinary Medicine, IPB University, Indonesia.
2. Prof. Dr. Nurliyani, Faculty of Animal Science, Universitas Gadjah Mada, Indonesia.
3. Prof. Dr. Evy Damayanthi, Faculty of Human Ecology, IPB University, Indonesia.
4. Nanung Fitriyanto, Ph.D, Faculty of Animal Science, Universitas Gadjah Mada, Indonesia.
5. Muhlisin, Ph.D, Faculty of Animal Science, Universitas Gadjah Mada, Indonesia.
6. Dr. Tuti Suryati, Faculty of Animal Science, IPB University, Indonesia.
7. Endy Triyannanto, Ph.D, Faculty of Animal Science, Universitas Gadjah Mada, Indonesia.
8. Yuny Erwanto, Ph.D, Faculty of Animal Science, Universitas Gadjah Mada, Indonesia.
9. Dr. Dwi Margi Suci, Faculty of Animal Science, IPB University, Indonesia.
10. Dr. Salundik, Faculty of Animal Science, IPB University, Indonesia.
11. Dr. Fatma Maruddin, Faculty of Animal Science, Universitas Hasanuddin, Indonesia.
12. Dr. Indri Juliyarsi, Faculty of Animal Science, Universitas Andalas, Indonesia.
13. Bayu Etti Tri Adiyastiti, M.Sc, Faculty of Agriculture-Animal Science, Universitas Muhammadiyah Malang, Indonesia.

AIM AND SCOPE

The journal will consider primary research and review articles from any source if they make an original contribution to the experimental or theoretical understanding and application of theories and methodologies of some aspects of animal products and technology-related field. It offers reader the opportunity to tap into the future of animal product technology. The journal reports advanced research results in food science, microbiology, biotechnology of animal products, functional food derived from animal products, and current findings in processing technology for animal products. Animal products include meat, dairy, poultry, insects and their by-products. It is essential reading for anyone needing to keep abreast of current findings in animal products and technology.

PUBLICATION ETHICS

Our Publication Ethics is mainly based on Elsevier policies and Committee on Publication Ethics/ COPE's Best Practice Guidelines for Journal Editors. These guidelines should be useful for authors, editorial board, and reviewers. These guidelines are intended to be advisory rather than prescriptive, and to evolve over time. We hope that they will be disseminated widely, endorsed by editors and refined by those who use them.

Author's Responsibilities

Reporting standards

Original research reports should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable. Review and professional publication articles should also be accurate and objective and editorial opinion works should be clearly identified as such.

Data access and retention

Authors may be asked to provide the raw data in their study together with the paper for editorial review and should be prepared to make the data publicly available if practicable. In any event, authors should ensure accessibility of such data to other competent professionals for at least ten years after publication (preferably

via an institutional or subject-based data repository or other data center), provided that the confidentiality of the participants can be protected and legal rights concerning proprietary data do not preclude their release.

Originality

Authors will submit only entirely original work, and will appropriately cite or quote the work and/or words of others.

Plagiarism and copyright

Plagiarism range from the unreferenced use of others published and unpublished ideas, including research grant applications to submission under "new" authorship of a complete paper, sometimes in a different language. It may occur at any stage of planning, research, writing, or publication: it applies to print and electronic versions. All sources should be disclosed, and if large amounts of other people's written or illustrative material are to be used, permission must be sought. This journal requires authors to declare that the work reported is their own and that they are copyright owner (or else have obtained the copyright owner's permission).

Multiple, redundant or concurrent publication

An author should not in general publish manuscript describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behavior and is

unacceptable. In general, an author should not submit for consideration in the authors and editors of the journals concerned must agree to the secondary publication, which must reflect the same data and interpretation of the primary document. The primary reference must be cited in the secondary publication.

Acknowledgement of sources

Proper acknowledgment of the work of others must always be given. Authors should also cite publications that have been influential in determining the nature of the reported work.

Authorship of the paper

Authorship should be limited to those who have made a significant contribution to the conception design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors.

The corresponding author ensures all contributing co-authors and no uninvolved person are included in the author list. The corresponding author will also verify that all

co-authors have approved the final version of the paper and have agreed to its submission for publication.

Disclosure and conflicts of interest

All authors should disclose in their manuscript any financial or other substantive conflict of interest that might be construed to influence the result or interpretation of their manuscript. All sources of financial support for the project should be disclosed. Examples of potential conflicts of interest which should be disclosed include employment, consultancies, stock, ownership and honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. Potential conflict of interest should be disclosed at the earliest stage possible.

Fundamental error in published works

When author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the journal editor or publisher and to cooperate with the editor to retract or correct the paper in form of an erratum.

TABLE OF CONTENTS

| | |
|--|---------|
| Editorial Team..... | I |
| Aim and Scope..... | II |
| Publication Ethics..... | III |
| Effect of Casein Tablet Made from Goat Milk Yogurt on Liver Histopathological Profile, Dioxin Residue, and Malondialdehyde level in Broiler Exposed to 2,3,7,8-Tetrachlorodibenzo-P-Dioxin <i>Nur Aeni, Arie Srihardyastutie, Chanif Mahdi.....</i> | 131-141 |
| Quality of Chicken Sausage Coated by Transglutaminase-Crosslinked Bovine Split Hide Gelatin and Soy Protein Isolate Edible Film During Chilled Storage <i>Dwi Wulandari, Yuny Erwanto, Yudi Pranoto, Rusman Rusman, Sugiyanto Sugiyanto.....</i> | 142-151 |
| Antibiotic Residues and Microbial Contamination in Animal-Derived Foodstuffs in Pontianak City, Indonesia <i>Yuli Arif Tribudi, Oke Anandika Lestari, Musa Alfius, Arif Hidayatullah.....</i> | 152-161 |
| Mechanical, Chemical and Microstructure Properties of Composite Edible Film Added with Modified Casein <i>Mulia W. Apriliyani, Ria Dewi Andriani, Premy Puspitawati Rahayu, Purwadi Purwadi, Abdul Manab.....</i> | 162-171 |
| The Use of Watermelon Rind Flour as Stabilizer for Reduced Fat Mayonnaise <i>Herly Evanuarini, Dedes Amertaningtyas, Dicky Tri Utama, Alief Rahmania Safitri.....</i> | 172-182 |
| Effect of Dietary <i>Agaricus bisporus</i> and <i>Auricularia auricula</i> Crude Extract Supplementation on Carcass Quality of Broiler <i>Muhammad Halim Natsir, Osfar Sjojjan, Reynaldy Hadi Ardyansyah.....</i> | 183-193 |
| Characteristics of Compost from Balinese Cattle Dung (CD) and Rice Straw (RS) using White Rot Fungus (<i>Wrf</i>) (<i>Ganoderma</i> sp) As Bioactivators <i>Muhammad Irfan Said, Jamila Mustabi, Siti Amelia Putri Syamsuddin.....</i> | 194-204 |
